

MERAKI - CLOUD MANAGED NETWORKING Service

I. DEFINITION

CTIN's MERAKI – Cloud managed networking service that based on Cisco Meraki solution is complete and perfect for group or enterprise with many branches and remote sites.

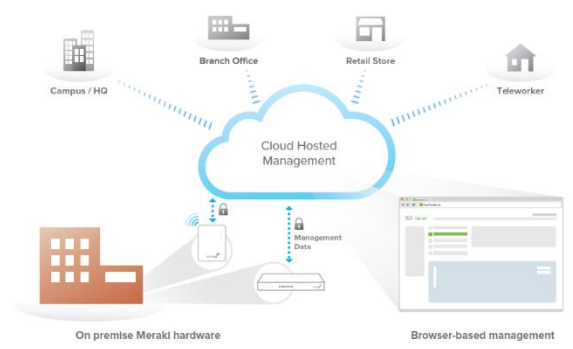

CTIN and Meraki's cloud based management provides centralized visibility & control over Meraki's wired & wireless networking hardware, without the cost and complexity of wireless controllers or overlay management systems. Integrated with Meraki's entire product portfolio, cloud management provides feature rich, scalable, and intuitive centralized management for networks of any size.

II. FEATURES

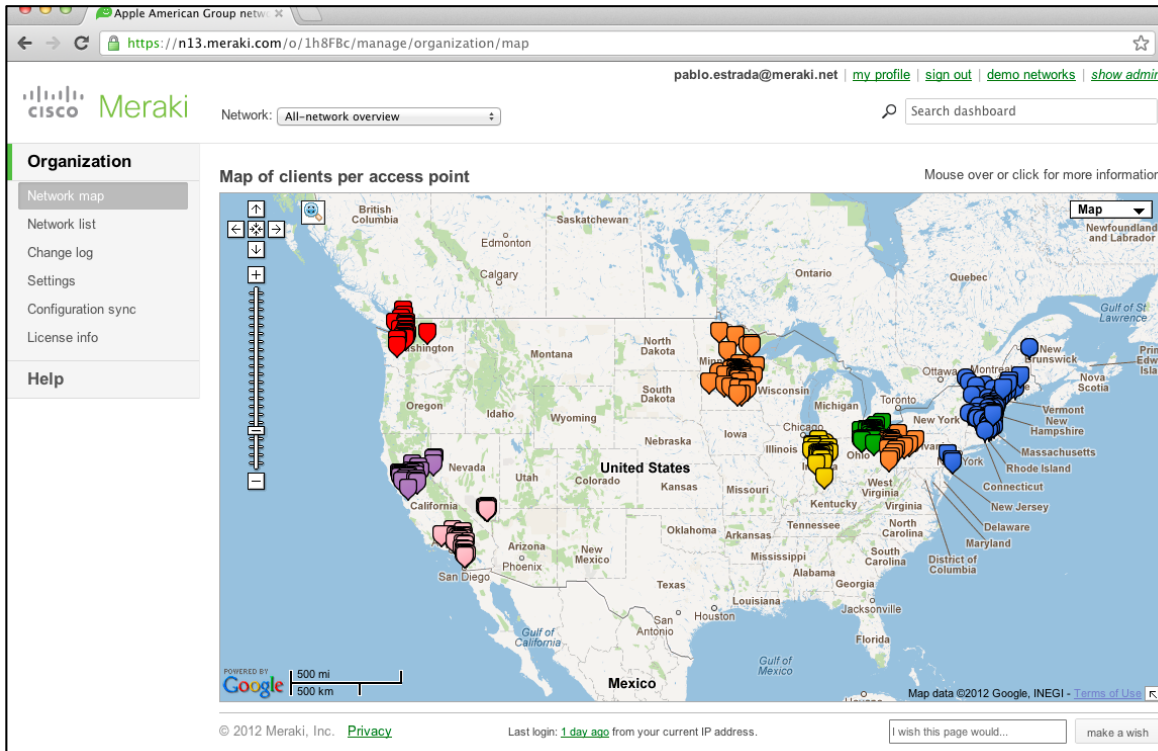

Important features include:

- Unified visibility and control of the entire network via a single dashboard: wireless, switching, and security appliances
- Streamlines large networks with tens of thousands of endpoints
- Zero-touch provisioning for rapid deployment
- Built-in multisite network management tools
- Automated network monitoring and alerts
- Intuitive interface eliminates costly training or added staff
- Network tagging engine - search and sync settings by tag
- Role-based administration and auditable change logs
- Continuous feature updates delivered from the cloud
- Highly available and secure (PCI / HIPAA compliant)

Powerful Insight and Troubleshooting Tools

III. BENEFITS

Benefits include:

- Rapid deployment with self-provisioning, self-optimizing hardware
- Control applications, users and devices
- Built-in multi-site management
- Automatic monitoring and alerts
- Set user policies
- Centralized management and reporting
- Reduce TCO: Move to an operating expenses (OpEx) model that lowers complexity for IT
